

# Transform Tomorrow, Today with **Eco-brick**

Build the future you  
want to live in

**Eco-brick**

By Wienerberger

# Do more with less

Introducing Eco-brick by Wienerberger – the evolutionary building solution that paves the way for a sustainable future without compromise. With up to **31 % reduction in upfront embodied carbon** and a design that facilitates **improved insulation**, Eco-brick isn't just a choice—it's the right choice.

## **Crafted for efficiency, designed for life**

Our slimline Eco-bricks not only enhance thermal performance but also reduce environmental impact, offering you a unique opportunity to decrease both carbon footprint and operational costs. Designed to meet the rigorous standards of today's building requirements, they are your stepping stone towards meeting and exceeding the Future Homes Standard.

## **Aesthetic meets ethics**

Available in a variety of stunning colors and designed for durability, Ecobricks provide the aesthetic flexibility to bring your architectural visions to life while committing to environmental responsibility.

## **Ready to build, ready to last**

Our comprehensive support system ensures that from the first brick to the last, your building experience with Eco-brick is seamless. Wienerberger's promise of quality and sustainability means you're building more than just structures; you're building legacies.

## **Join the revolution in building**

Choose Eco-brick and embrace a building solution that offers more than just savings. With enhanced on-site efficiency, fewer required resources, and a significant reduction in transport emissions, Eco-brick isn't just another brick in the wall—it's the future of building.
