KNOWLEDGE BUILDER _

WIENERBERGER FREE RIBA ACCREDITED CPDS

It is important that Architects and Specifiers maintain a competitive edge and CPD Seminars offer an ideal opportunity for professionals to enhance their knowledge and skills in existing and new areas of practice, crucial to maintaining qualified status and an appropriate level of expertise.

Wienerberger offers complementary CPD seminars to architectural professionals keen to update their knowledge of clay bricks and blocks, roofing and paving, along with an overview on the basic foundations of BIM.

Wienerberger's in-depth CPD seminars are all certified by the Royal Institute of British Architects (RIBA). The courses are available as face-to-face presentations delivered by experienced, qualified personnel, as well as online courses offered through a dedicated CPD platform.

Visit our CPD Knowledge Builder website at knowledgebuilder.wienerberger.co.uk

Alternatively, to book a Wienerberger CPD seminar email us with details of the CPD you are interested in to WBUKMarketing@wienerberger.com.

Wienerberger

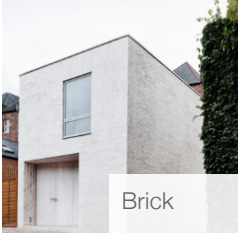

OUR FREE COURSES INCLUDE:

Brick

Technical Considerations When Designing with Brick¹

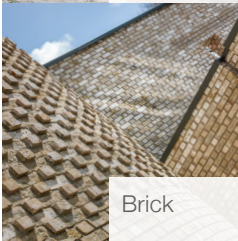

This seminar looks at the most important technical issues that need to be taken into consideration when designing with clay brick to ensure that it retains its quality and beauty. Product selection, brick properties, expansion joints and mortar are all discussed with a focus on how this can affect design and detailing. The presentation also looks at standards, sustainability and construction methods.

Brick

Brick Design and Innovation^{1,2}

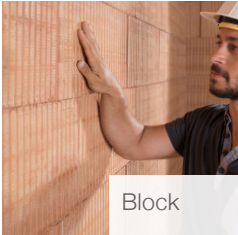

An introduction to the basic properties of bricks, clay masonry and their appropriate specification. This seminar explores ancient and modern iconic brick structures, takes a look at special bricks, green credentials, along with case studies of projects where none standard brick products are used to good effect.

Brick

Designing for Movement in Brickwork¹

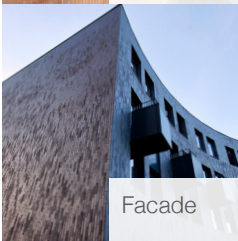

A CPD seminar which looks at the basic British Standard requirements, those situations where problems have arisen and how a designer can minimise the risk of damage.

Block

Multi Cellular Clay Block Wall System: A Modern Construction Method with the Reassuringly Traditional Values of Clay^{1,2}

This CPD course will provide the designer with other MMC options for walling systems, raise awareness about other walling systems that are environmentally friendly, educate in CDM benefits and safer site traffic management and identify a system that accords with current legislation.

Facade

Brick Tile Cladding System¹

This seminar explains brick tile cladding systems, their history & what the systems can be used for. The course will outline the system development brief & components, the colour range of the tile components and the unique features of the system.

RIBA CORE CURRICULUM

¹ Design, construction and technology

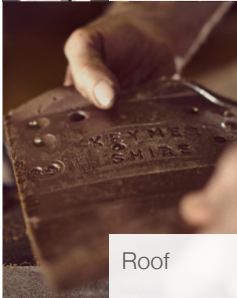

² Building conservation and heritage

³ Legal, regulatory and statutory compliance

Combining Technology with Tradition - A history of natural clay^{1,2}

In order to better understand what is possible, you must first understand what has past; this compelling CPD guides you through time to allow you to understand the routes of modern roofing. The seminar then considers modern clay roofing and how the traditional has merged with modern technology to provide materials and solutions that meet today's legislative requirements.

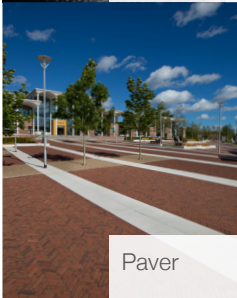

A History of Handmade Tiles (Keymer)^{1,2}

This interesting CPD guides you through time to allow the recipient to understand the roots of traditional heritage roofing. The CPD then considers the pitfalls associated with heritage roofing product selection that have arisen, and recognises how the designer can minimise the risk of damage.

Control of Roof Space Condensation^{1,3}

This CPD presentation covers the causes of condensation in buildings, identification of the Building Regulations relating to condensation control and practical examples of how to comply with the latest standards.

The Benefits of Clay Paving¹

This seminar looks at the benefits of clay paving and where and when it can be used. It will help delegates to understand the different sizes and forms of clay pavers, how to choose the right construction method, a brief look at rigid and flexible construction methods for clay pavers and laying patterns, the importance of edge restraint and the short and long term maintenance requirements.
